Body Title: Slow growth handbags? Test yours for GMOs.

Text: Most bags are so morphed that they look like *Clover Field's* monster gone-wild on a bridge & tunnel binge; or they're so world-weary that they resemble a Bedouin saddlebag that had been dragged across the desert.

Then, there are M0851 brand bags! While maybe a bit androgynous, they are still decidedly handbag, book bag, or briefcase, urban and urbane.

They are designed by a man/woman team in Montreal, Quebec; made in the same city; and sold only a few blocks down the street from manufacture.

And here is where you can find some for sale online:
